Experience _

Frontend Engineer

Tatsu Works

Singapore (Remote)

06/2022 - Present

- Led the front-end development of a community-focused Discord Bot using TypeScript and GraphQL, from gathering user requirements to overseeing feature implementation, testing, and deployment, achieving integration with over 1.4 million Discord servers worldwide.
- Redesigned the corporate website with innovative designs and features built with ReactJS and TailwindCSS, achieving a rise in traffic to 50,000 monthly visitors and successfully implemented a subscription newsletter that gained over 7000 subscribers in just 3 months.
- Collaborated with the team to develop the user-centric frontend interface for seamless Solana web3 wallet integration, enabling users to link accounts and claim in-game rewards on the Solana blockchain.
- · Designed and developed a user-friendly internal dashboard that automated the workflow of updating assets and user data, simplifying data management tasks for 50 employees daily.
- Streamlined the deployment process of the Discord Bot on AWS using CI/CD pipelines, overseeing updates from development to production and enabled seamless feature rollouts using Kubernetes and Docker.

Junior Frontend Engineer

DM. Dasher

Malaysia (Hybrid) 09/2021 - 05/2022

- Developed and optimized an Order Management System using ReactJS and Material UI, enhancing real-time sales tracking and efficiency for 80 employees, driving \$1m in annual sales.
- Collaborated with UX designers to develop scalable and performance-focused React components for a NextJS-based parcel tracking website, processing over 500K orders across diverse platforms.
- Conducted A/B testing to optimize product pages on Shopify platform, implementing a responsive and enhanced visual and user experience for the website.

Frontend Engineer, Internship

Code for Asia Society

Singapore (Remote) 01/2021 - 07/2021

- Optimized the frontend interface of a web application for hackathon event management built with React/S and Bootstrap, ensuring a seamless registration experience for over 500 participants.
- Redesigned and enhanced the website's interface and integrated RESTful APIs, significantly improving navigational flow and system efficiency, which helped boost user engagement metrics and reduced loading time.
- Conducted regular code review sessions and authored documentation to enhance team knowledge-sharing and codebase maintainability.

Education

Bachelor of Computer Science

Taylor's University

Malaysia 03/2019 - 07/2021

Diploma in Information Technology

College MDIS Malaysia

Malaysia 04/2016 - 11/2018

Projects_
